Good basic game. Decent selection of accurate weapons. Typical WASD with jumping and running also.

Easy to use map editor though it doesn't have a big variety of textures. Holding the right mouse allows you to place multiple blocks but blocks placed in this manner become one object.

You can't break it down into smaller chunks. To make windows you have to frame them out first and then fill in the gaps or make walls one block at a time which isn't that hard with speed clicking.

For the price the game is worth getting and hopefully we'll see the playerbase increase.

. I would like to say a few comments about the game. Graphics have improved a lot since the original. The weapons targeting is much better, there is a level editor. What is bad is the lack of old tracks, it is not possible to play every game on each track. And what was the worst thing in the original was the rocket and the grenade launcher ... These two guns would get a lot of fun on a level. Please let the original tracks be added to the map repertoire and take out this 2 gun weapon and the game will be good. If you want more players then I think you're about to throw 1000 keys and what's important to give the game a workshop support. It would be very good if you could download maps from a workshop. Thanks for reading it. If you have answered, please email me at lirdce1@gmail.com. [Doesn't ever connect to servers.. Pixel warfare in your browser is a lot better this is just a bad copy of the free internet video game. This game is so funny Durango physics when you shoot a shotgun in the face when they fly off the map it's so funny. 0 peoples play this. game :V. Expected Minecraft with guns Got Roblox with no girlfriends](#)

This game is a clunky mess there's a second delay between a keyboard press and when it registers and this is with a ping of about 30.. Pixel warfare is just another Minecraft FPS shooter that jus doesn't feel finished

The game is ugly and lacks any personality and it just feels like another unity rush job. The empty servers and the lack of music would be a little more forgivable if the game was free but having a \u00a33.99 price tag is just a little ridiculous

There are so many better pixel based FPS's out there so save your money and dont waste your time on this mess

If you want to see what this game is like without wasting your money, heres a little video showing what the game has to offer

<https://youtu.be/wNYn-TAk0QU>. I don't usually write reveiws..first time actually. But just wanna put this out there right quick.

[For those who are puchasing or have ths game and cannot find anyone to play with, please do note that the game did just come out Yesterday. \(It is September 21 now as I am writing this reveiw.\) So please give it some time before saying no one plays this game. However, the game itself has a lot of interesting features and aspects. Pretty good amount of weapons, the maps are pretty cool, you can make your own maps as well. IMO, it still needs more game modes rather than just deathmatch and Zombies. A survival mode would be really good for this game!!! Fighting off enemy waves of zombies or soldiers, whoever. I hope it happens, that would be a fantastic addition. Anyways.. This is a very good multiplayer game. If you love multiplayer FPSshooters with pretty good maps to play on \(and hopefully more gamemodes in the future\)...this is the game for you. Get this game, tell your friends about it and spread the word so we can get more players to battle!!!](https://youtu.be/wNYn-TAk0QU)
